How to pack a lightweight tent

This resource can help with the following Camping areas:

- Stage 3: I know why we bring certain gear on camp for our team.
- Stage 4: I know how to use our team gear correctly and safely.

1. Pack all your poles into your pole bag, and pegs into a peg bag.
2. Spread out the tent inner on the ground.
3. Fold the outer skin in half and place over tent inner.
4. Using your pole bag measure the width of the tent inner to determine the number of folds required to allow the tent to fit into the tent bag.
5. Fold the tent to the width of one pole bag.
6. Place the Pole and peg bags on one end of the folded tent

Top tips:
In windy conditions leave two corners of your tent pegged into the ground to hold the tent down)
The tent bag are sized to fit the tent poles. So when folding your tent, use the tent poles to measure the amount of folds required to ensure the tent will fit into your tent bag.
